

Little Kids First Big Book

Did You Know . . . The Nile crocodile can weigh as much as a piano? Carbon dioxide is the gas that makes soda fizzy? It takes 1 million tiny water droplets to form a single raindrop? Kids will learn these facts and more from the newest book in National Geographic's "Little Kids First Big Book of Science" series! From outer space to the deep blue ocean, kids (and parents) can take a fun and fascinating journey through the incredible world of science. National Geographic's latest book in the "Little Kids First Big Book" series, **Little Kids First Big Book of Science** by Kathleen Weidner Zoehfeld (National Geographic; April 2019; U.S. .99; Hardcover; ISBN: 978-1-4263-3319-4; 128 pages w/ 175 full-color illustrations; Ages 4-8 years/Grades Preschool-3), inspires kids to be curious, ask questions and explore the world around them — just like scientists. Whether it's keeping a journal of science experiments or exploring the ecosystem right in their own backyard, kids will get an exciting introduction to the basic branches of science, including life science, earth and space science, and physical science, as well engineering. The book also includes: An overview of the **different kinds of science, including:**

- Astronomy
- Botany
- Paleontology
- Malacology
- Zoology

A look into **what scientists study, such as:**

- Animals and plants
- Oceans and space
- Earthquakes and volcanoes
- Sound and light
- Inventions

"The National Science Teachers Association (NSTA) affirms that learning science and engineering practices in the early years can foster children's curiosity and enjoyment in exploring the world around them and lay the foundation for a progression of science learning in K-12 settings and throughout their entire lives." NSTA POSITION STATEMENT, Packed with stunning photography, fun facts and interactive questions, this irresistible book focuses on high-interest topics that are written at a level appropriate for beginning readers or for reading aloud. Activities, games and simple experiments will also encourage hands-on learning, showing kids that anyone can use scientific observation and experimentation to be a scientist and explore the world around them. **ABOUT THE BOOK:** Title: Little Kids First Big Book of Science Author: Kathleen Weidner Zoehfeld Series: Little Kids First Big Book Publisher: National Geographic Pub month: April 2019 On sale: March 26, 2019 Price: U.S. .99 Format: Hardcover ISBN: 978-1-4263-3319-4 Pages: 128 w/ 175 full-color illustrations Ages/Grades: 4-8 years/Preschool-3 **NATIONAL GEOGRAPHIC PARTNERS LLC** National Geographic Partners LLC (NGP), a joint venture between National Geographic and 21st Century Fox, is committed to bringing the world premium science, adventure and exploration content across an unrivaled portfolio of media assets. NGP combines the global National Geographic television

channels (National Geographic Channel, Nat Geo WILD, Nat Geo MUNDO, Nat Geo PEOPLE) with National Geographic's media and consumer-oriented assets, including National Geographic magazines; National Geographic studios; related digital and social media platforms; books; maps; children's media; and ancillary activities that include travel, global experiences and events, archival sales, licensing and e-commerce businesses. Furthering knowledge and understanding of our world has been the core purpose of National Geographic for 131 years, and now we are committed to going deeper, pushing boundaries, going further for our consumers ... and reaching millions of people around the world in 172 countries and 43 languages every month as we do it. NGP returns 27 percent of our proceeds to the nonprofit National Geographic Society to fund work in the areas of science, exploration, conservation and education.
